

# Build on Your Knowledge to Innovate.

*Rise above the challenges of today's global economy by expanding your knowledge and building a new culture of innovation.*

Enhancing your automation skills and learning from others' experiences are among the best methods for improving plant efficiency and reducing costs in a tight capital investment environment.

***Come build with the best and the brightest.***

Join fellow Emerson users, who together have delivered hundreds of amazing automation & control results to help their companies compete and thrive in challenging times.

Led by users, for users, this conference is one of the industry's most comprehensive collections of user-driven presentations and workshops on innovative technology applications, process optimization strategies, and investment justification. With more than 300 Workshops, Short Courses, and Industry Forums, this year's content promises to be the most applicable and valuable yet.

Sessions are organized into the following subject areas:

- **Asset Optimization/Maintenance & Reliability**
- **Business Operations, Integration & Intelligence**
- **Control System Modernization**
- **DeltaV and Ovation System Applications**
- **Emerson Product/Service Updates**
- **Instrumentation Applications**
- **Management**
- **Process Optimization**
- **Project Management and Engineering Tools**
- **Safety Instrumented Systems**
- **Valve Applications**
- **Wireless Applications**
