

2010 Control Valve Courses

Valve Technician I Short Course

This hands-on workshop explores functionality, installation, and calibration of valves and actuators. Installation, troubleshooting, parts replacement, and calibration of control valves, actuators and positioners, will be emphasized. Learn how to:

- Correctly perform installation procedures
- Perform basic troubleshooting
- Properly apply and calibrate positioners
- Change valve trim, gaskets and packing

March 8 – 11

Course 1404 \$2495.00

Control Valve Sizing

This course explains how to select the correct control valve, actuator and accessories to operate through a full range of process conditions. The session will also include a review of severe service applications such as large pressure drops, high noise, high temperature steam, and the appropriate control valve for these more difficult applications.

March 30

Course PCX-2 \$400.00

AMS Intelligent Device Manager

Completing the exercises which make up the AMS Device Manager training modules provides the quickest route to productive use of the AMS Suite of software. The training exercises focus on skills required by engineers and technicians, and are based on real-world tasks. Modules include, Configuring and Using AMS Device Manager, AMS System Administration, and AMS SNAP-ON Applications.

March 16 – 18 or September 28 – 30

Course 7020 \$2295.00

DVC Performance Diagnostics

This one day class will instruct users on how to set up the advanced performance diagnostics features of the DVC product family. Spec sheet data needs to be set up correctly to get the most value from the PD instrument.

This course will cover fine tuning spec sheet data as well as covering:

- One button sweep
- Friction diagnostics
- Profiles
- Triggered profile
- Alert Records

Users will use both the handheld communicator (375/475) as well as the AMS Valvelink snap-on to perform the exercises. Advanced diagnostics functions such as step responses and total scans will also be covered.

March 12

Course 1404A \$750.00

QuickCheck AMS Device Manager SNAP-ON

QuickCheck allows you to:

- Correctly accelerate interlock check-out during plant commissioning
- Reduce commissioning time when testing SIS voting
- Read and export as-built configuration information
- Gain real-time information from the AMS Intelligent Device Manager

February 18 or October 21

Course PCX-5 \$400.00
